

Daniel's Vision of the Future!

From the series: "The Script is already Written." by Gaetan

Have you ever wondered what our modern age would look like to people living thousands of years ago?

Around the year 535 BC, the prophet Daniel received the following:

"But you, Daniel, shut up the words, and seal the book until the Time of the End; many shall run to and fro, and knowledge shall be increased."

Daniel chapter 12:4

Here the Lord is telling his prophet to close up and seal the book. Daniel, who had just received some of the most detailed prophecies regarding the future, was now being told to:

"Close up and seal the book! As far as you're concerned, Daniel, this message is not for you. This news, this information is not for your time. It's for My children two-and-a-half thousand years from now, Daniel, that's who it's for! – For the people who will live in those days."

And then He gives him
an indication of what this
End Time will be like:

*"...many shall run to
and fro and knowledge
shall be increased!"*

Wow, in two little
phrases the Lord really
says a mouthful! From
what Daniel is being told,
he understands that the
message is not to be
fully understood until the
End of the Age.

Many running to and fro
literally means:

*“Speeding about, here
and there,” or “travel shall
be vastly increased.”*

People travel more today
than they ever travelled
before!

When you consider that people's means of transportation—horse and buggy, wagons, camels, sail boats, etc.—did not change substantially for thousands of years, you can appreciate the significance of this prophecy.

In 1789, it took George Washington eight days to travel the 200 miles from his home to his inauguration in New York City. The fact that it took eight days is not significant. What is noteworthy is that Julius Caesar could have made the same trip just as rapidly in the year 50 BC!

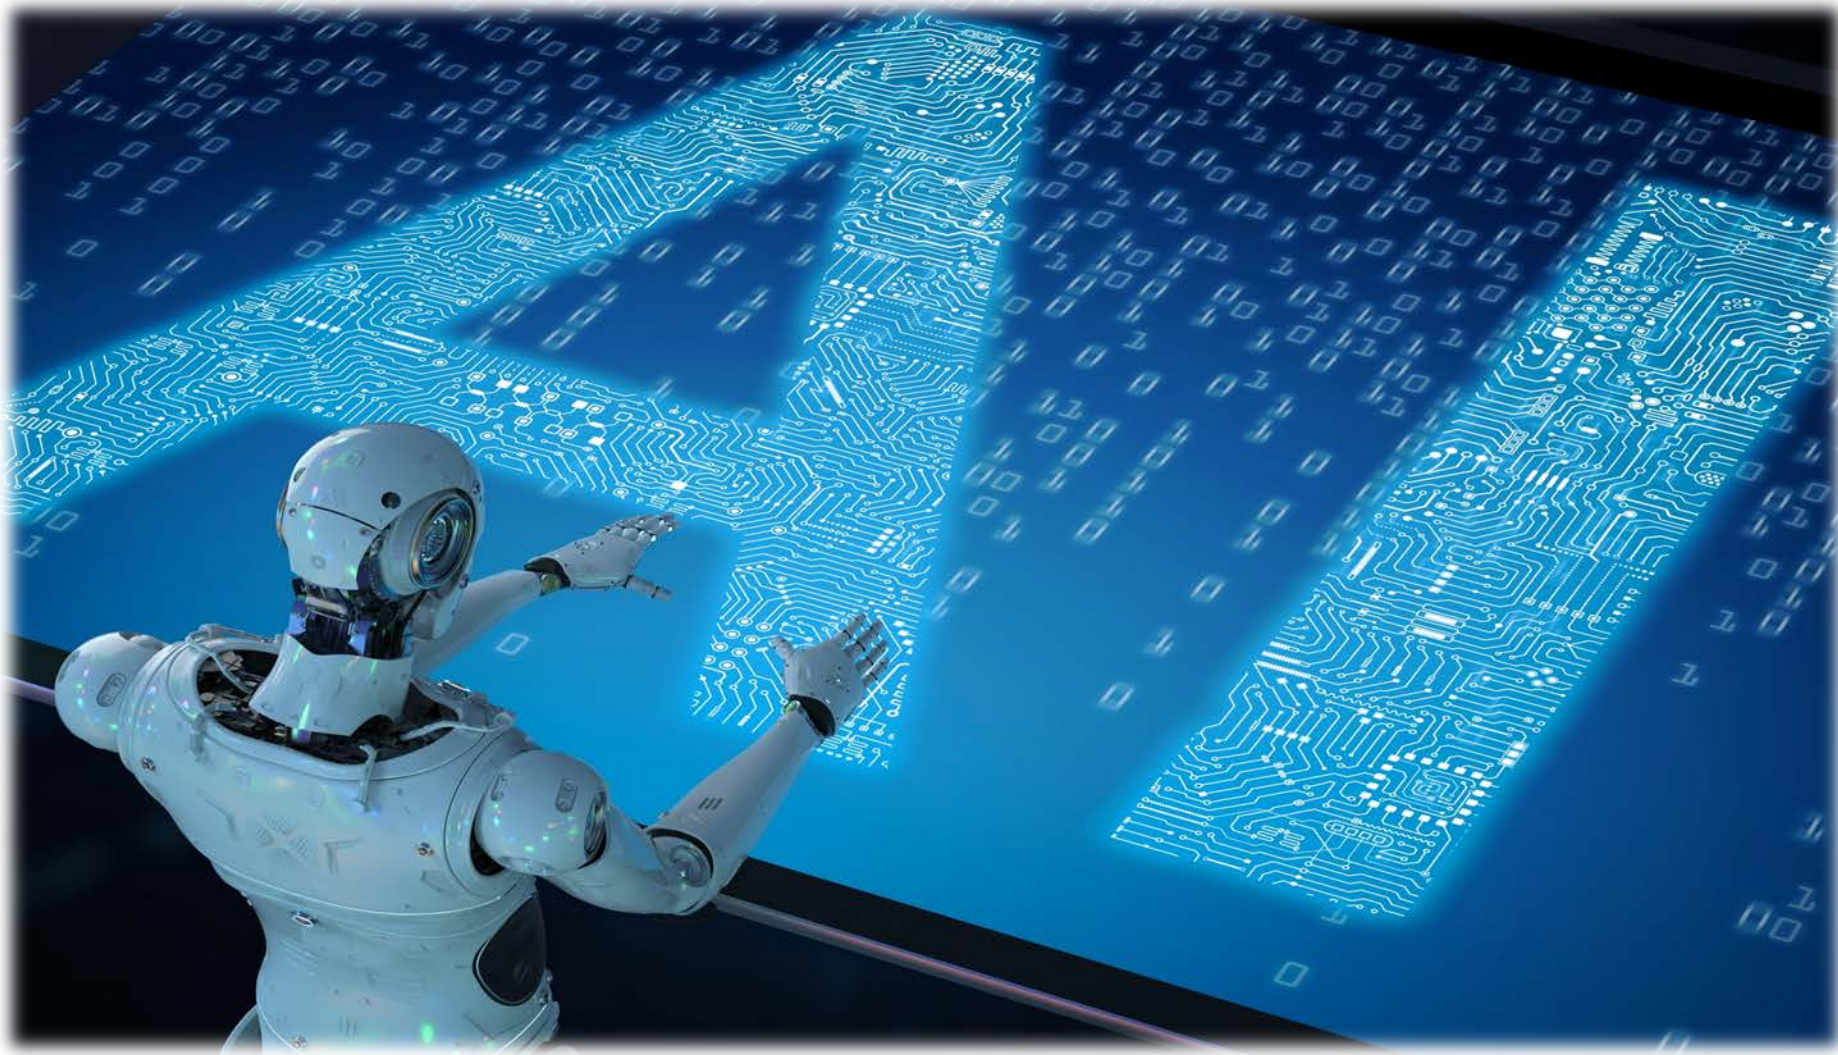

No real progress had been made in transportation over the 18 centuries that passed between their lifetimes. Mankind still travelled by foot, animal or sailboat etc.

But look how transportation has advanced in the past 150 years! Today, we not only drive at tremendous speeds, but we fly, and even go to the moon! --Over 280 million people now travel outside their own countries every year!

“And knowledge shall be increased”.

WHEW! It has been increased within this past hundred years of this End Time almost beyond imagination! --To the point now that machines have gotten so complicated only the best scientists can even understand them! And now **AI** technology is even taking over the thinking of man and is able to do feats of thinking, calculation, memory and computation far beyond the limits of the human mind!

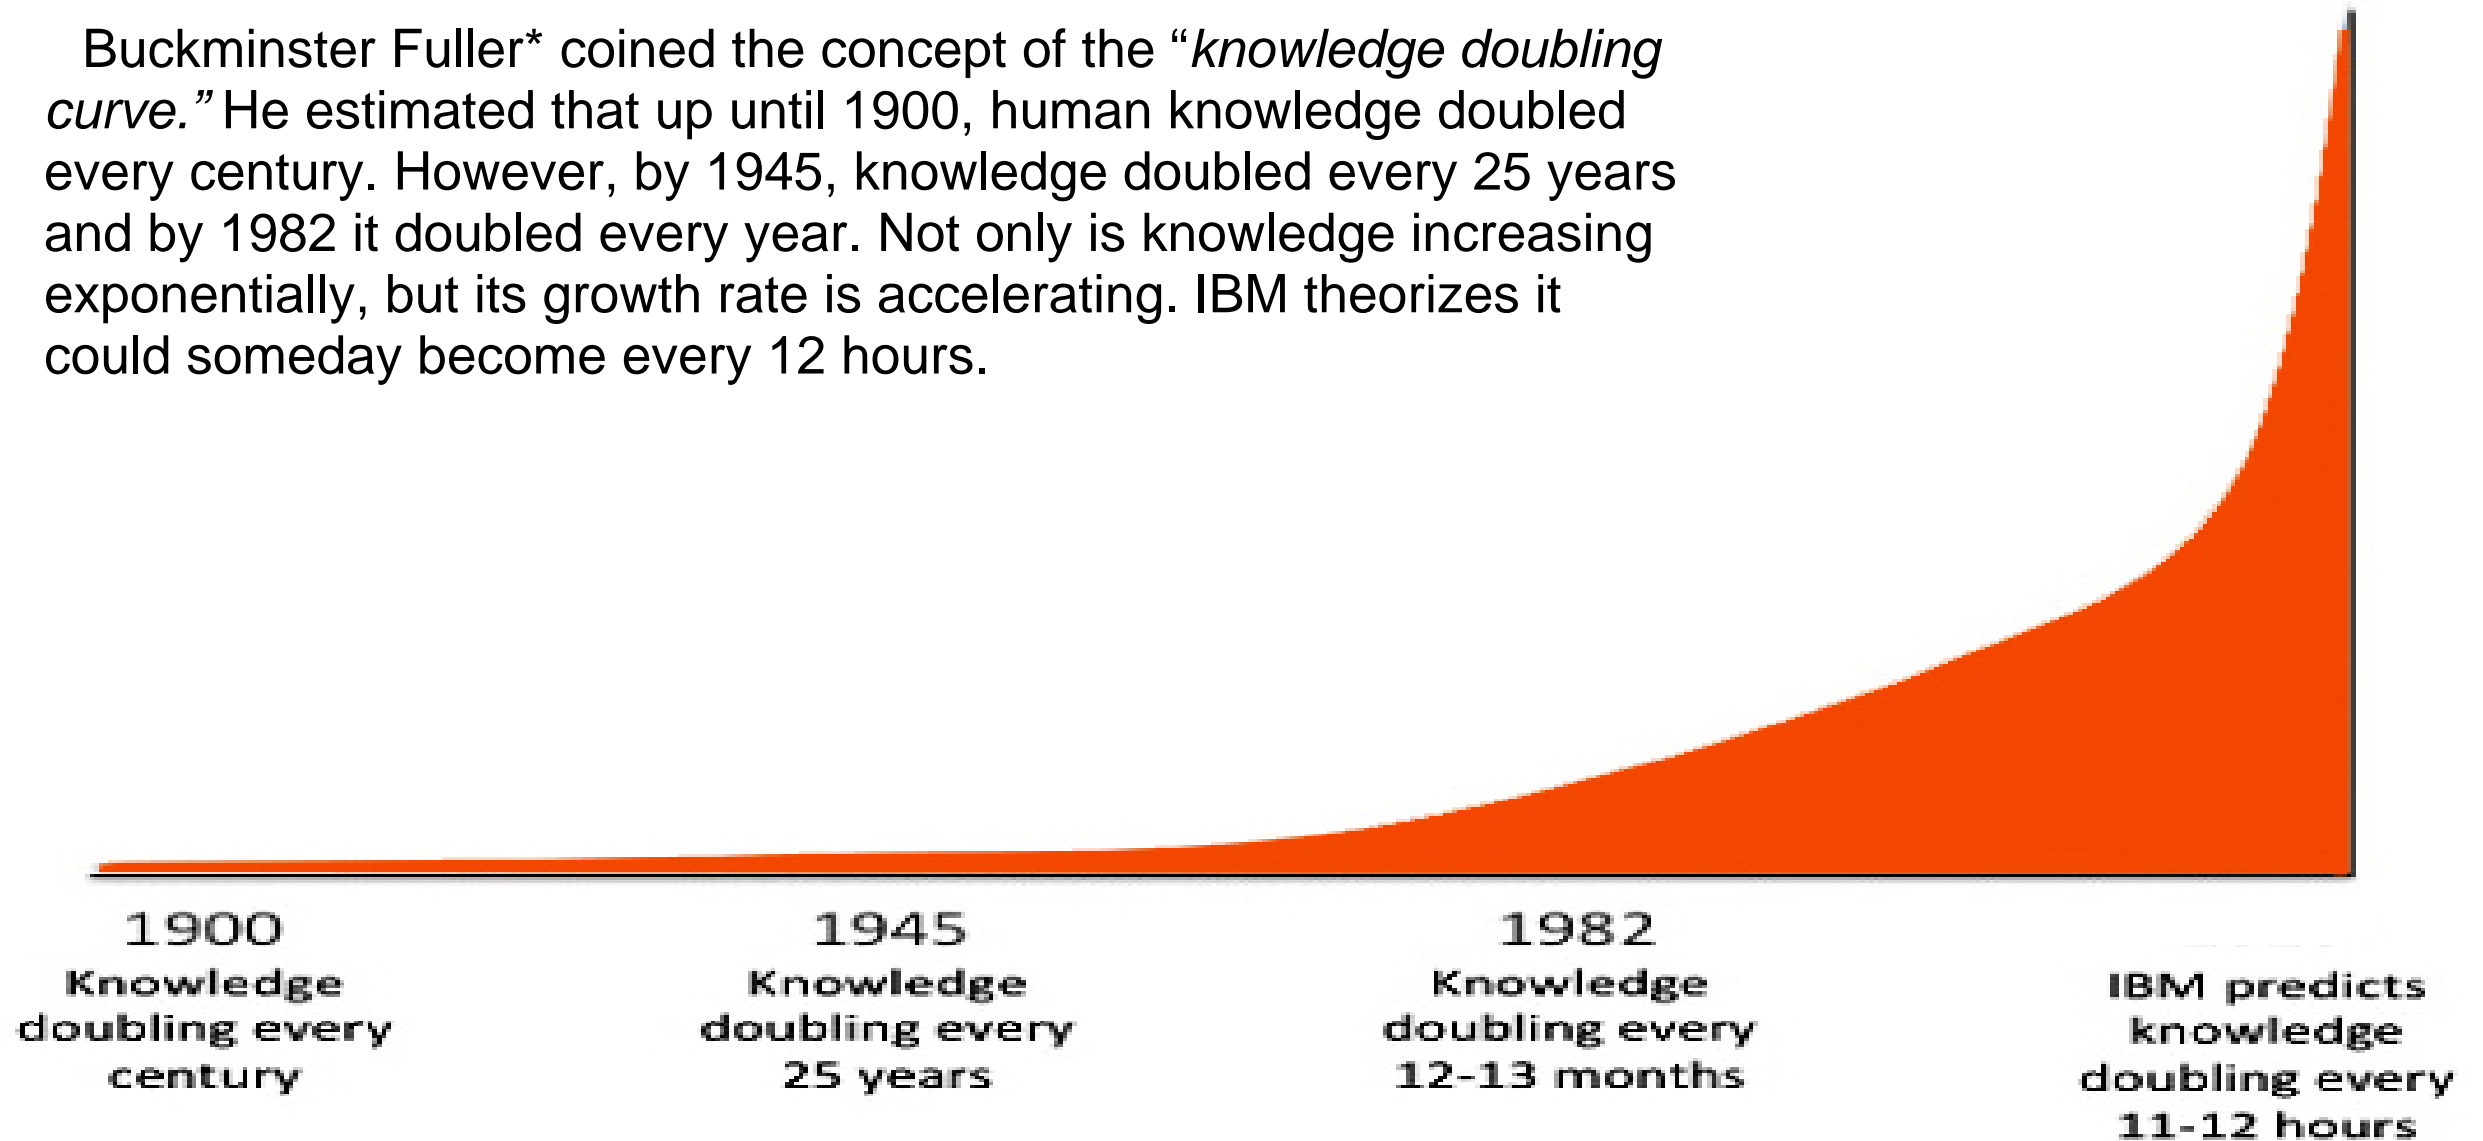

It is with good reason that the term

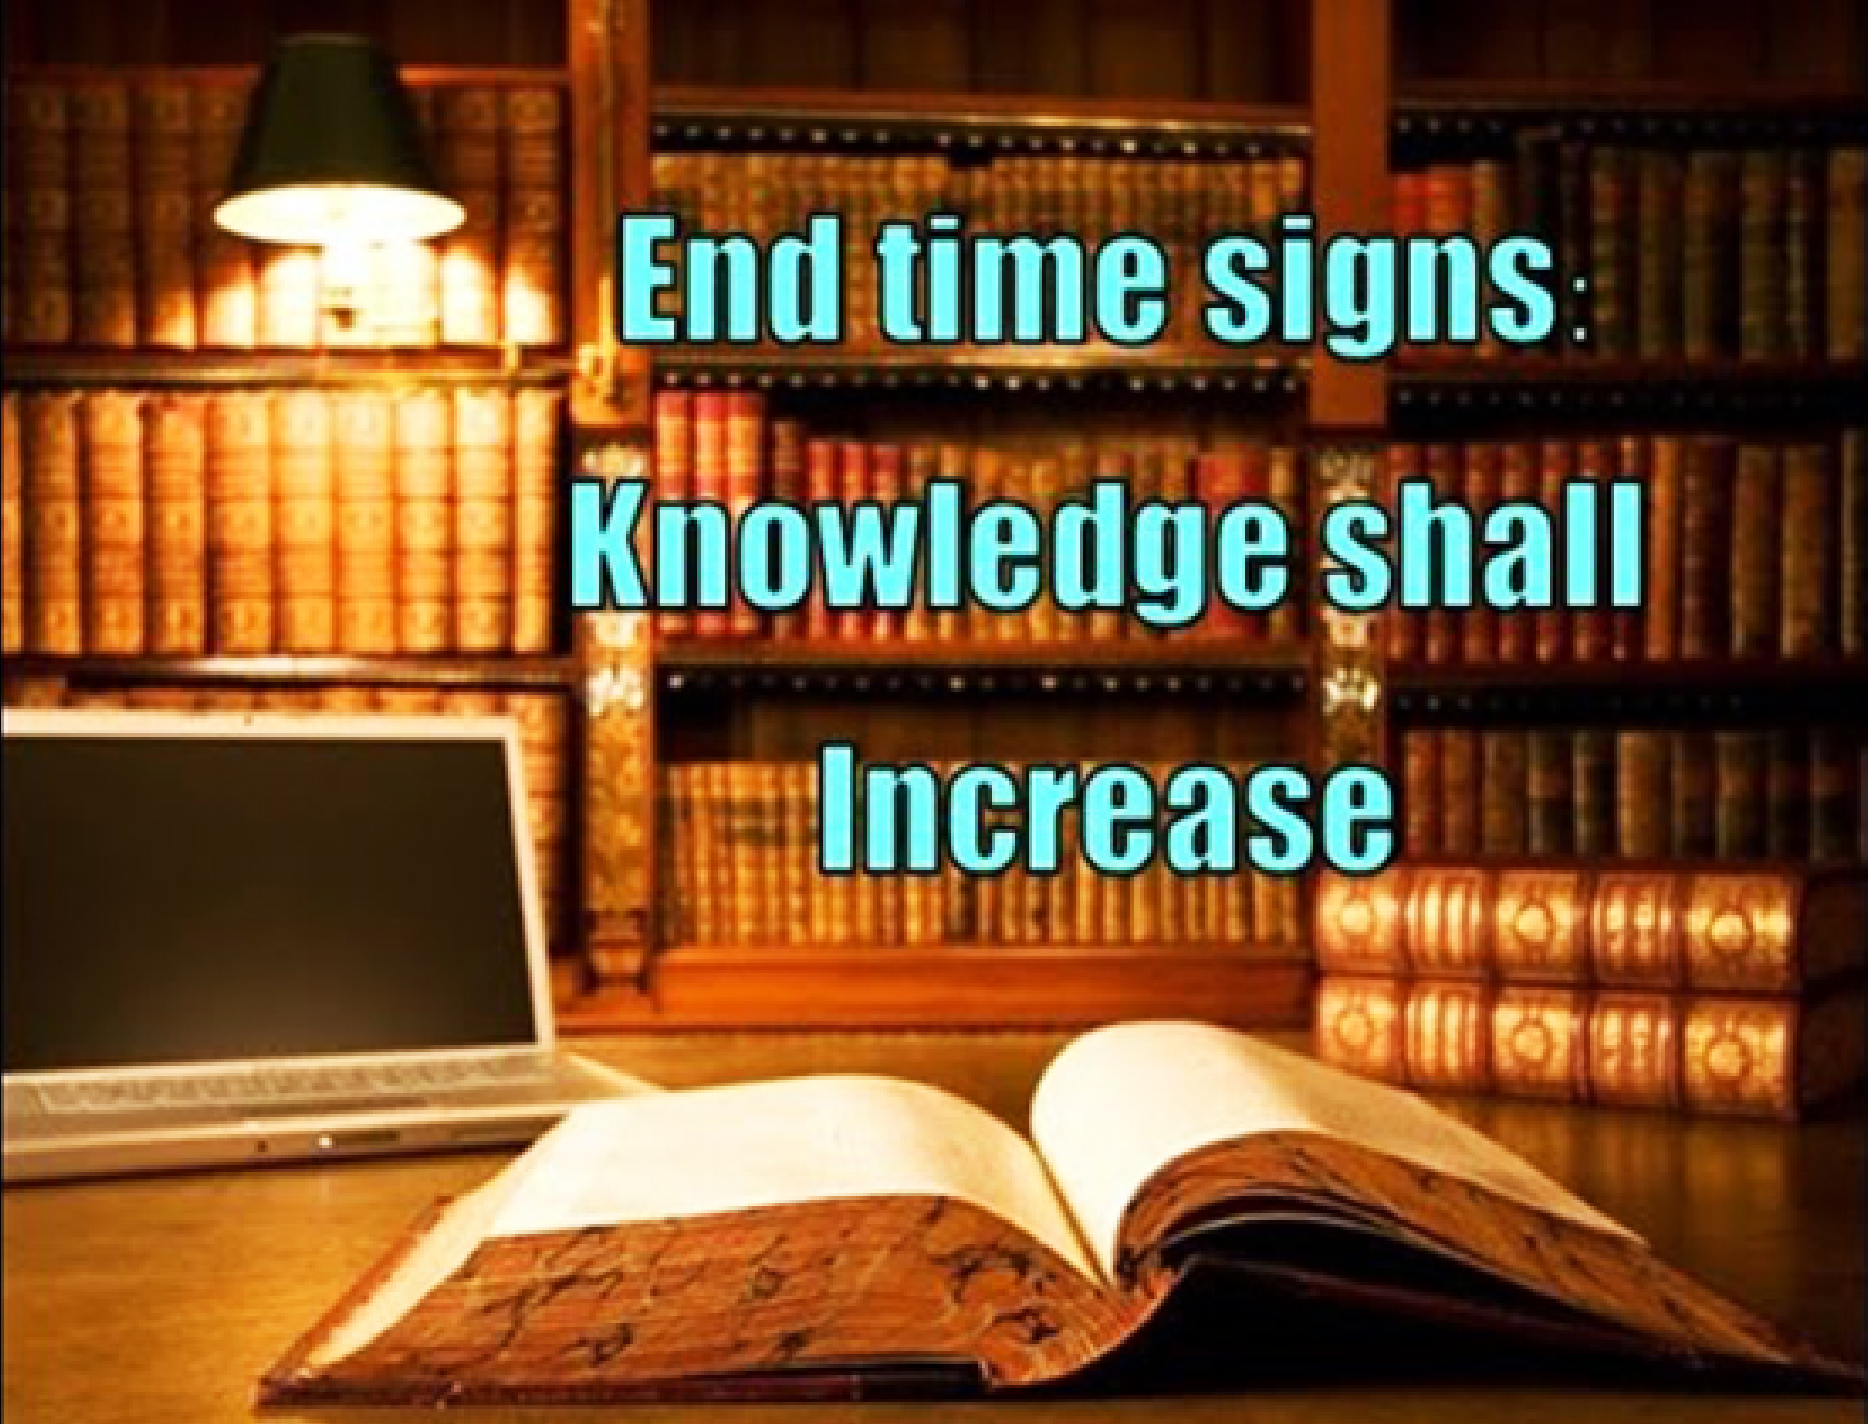

“Information overload”

was coined in recent years. If the incredible amount of information that is currently accessible is an indication of the overall knowledge available today, then knowledge has increased within our generation almost beyond imagination!

Buckminster Fuller* coined the concept of the “*knowledge doubling curve*.” He estimated that up until 1900, human knowledge doubled every century. However, by 1945, knowledge doubled every 25 years and by 1982 it doubled every year. Not only is knowledge increasing exponentially, but its growth rate is accelerating. IBM theorizes it could someday become every 12 hours.

End time signs: Knowledge shall Increase

What is fascinating is that the Bible predicted 2,500 years ago that both travel and knowledge would increase as a sign of the End Time:

**"But you, Daniel,
shut up the words,
and seal the book
until the time of
the end;
many shall run to
and fro, and
knowledge shall
increase."**

Daniel chapter 12:4

An amazing
fulfilment of Bible
prophecy!!

Think of that!
